

Nabaraj KC

Imadol, Lalitpur, Nepal | +977-9761696109 | nabarajkc43@gmail.com | Portfolio: nabarajkc.com.np | GitHub: github.com/nabaraj-kc

OBJECTIVE

BSc CSIT student and freelance AI developer applying for the Generative AI and LLM Application Development role at Nepal Code Academy. Experienced in building AI systems including multi-provider LLM pipelines, layout-preserving text parsers, and speech analytics tools. Looking to apply technical development experience in a collaborative engineering team.

SKILLS

- **Generative AI & LLM Development:** Multi-provider LLM orchestration (Gemini, DeepSeek, Claude, Groq), prompt design, AST layout parsing, evaluation metrics.
- **Full-Stack Web & Mobile:** Python (FastAPI), TypeScript (Next.js 15, React 19, Tailwind CSS), Flutter, Dart, Node.js, Express.
- **Machine Learning & Data Science:** Feature engineering, model evaluation, Scikit-Learn, XGBoost, Pandas, Joblib.
- **Databases & Infrastructure:** PostgreSQL, MongoDB Atlas, Firebase Admin, SQLite, Prisma ORM, Docker Compose.

EXPERIENCE

Freelance AI/ML Developer | Self-employed, Nepal (2024 - Present)

- Develop and deliver custom AI software systems for clients, managing requirements through to final deployment.
- Engineered Humanizer AI Engine, a FastAPI application that parses documents into Abstract Syntax Trees to rewrite prose while keeping code blocks, tables, and Markdown layout locked.
- Built Nexturs Intelligence, a monorepo platform connecting a FastAPI backend with a React frontend using Pydantic schemas for structured agent execution.
- Developed VoiceCoach AI in Flutter, integrating on-device speech-to-text, real-time filler phrase detection algorithms, and vocal metric tracking.
- Created and deployed personal developer portfolio platform featuring an embedded Gemini streaming assistant and an AST-based resume scoring tool.

SELECTED PROJECTS

Humanizer AI Engine (Python, FastAPI, React, DeepSeek API, Gemini API, Groq SDK) -

github.com/nabaraj-kc/Humanizer-AI-Engine

- Built a multi-provider LLM pipeline that extracts prose nodes via AST parsing, allowing text rewriting without corrupting Markdown formatting, code blocks, or mathematical formulas.
- Implemented perplexity scoring, burstiness analysis, and an inline visual diff component for output comparison.

Developer Portfolio & AI Suite (Next.js 15, React 19, Tailwind CSS, Gemini API, Tavily API, MongoDB) - nabarajkc.com.np

- Developed a web platform hosted at nabarajkc.com.np featuring an integrated Gemini streaming assistant and an automated ATS resume scoring tool.
- GitHub repository: github.com/nabaraj-kc/portfolio

Nexturs Intelligence (Python, FastAPI, React, Docker Compose, Pydantic) - github.com/nabaraj-kc/Nexturs-Intelligence

- Architected a full-stack monorepo application for running structured AI agent workflows with Pydantic schema validation and multi-container Docker deployment.

VoiceCoach AI (Flutter, Dart, Riverpod, Hive DB, Speech-to-Text) - github.com/nabaraj-kc/VoiceCoach-AI

- Created a cross-platform mobile application that tracks live speech, detects filler phrases ('um', 'uh', 'like'), calculates words per minute, and persists session history locally using Hive DB.

CardioRisk AI (Python, Streamlit, Scikit-Learn, XGBoost, Pandas) - github.com/nabaraj-kc/CardioRisk_AI

- Trained classification models (Random Forest and XGBoost) on UCI heart disease data with feature scaling and missing value imputation to estimate cardiovascular risk.

EDUCATION

BSc. Computer Science and Information Technology (CSIT) (2025 - 2029 Expected)

Mega College, Lalitpur, Nepal

LANGUAGES

Nepali (native), English (fluent), Hindi (fluent)
